The University of Szeged is one of the leading higher education institutions in Hungary. The university is located in Szeged, the sunniest town of this Central European country, member of the European Union. The town attracts thousands of young people with its lively (and loveable) urban lifestyle and colourful festivals.

Our university, with a history dating back to 1581, prides itself on a number of its great scientists and researchers, among them the Nobel Laureate Albert Szent-Györgyi who discovered Vitamin C.

According to higher education rankings, based on the examination of the quality of education, teachers and students, the University of Szeged is considered to be among the best universities in the world.

The University of Szeged offers training and research facilities of the highest standard in the fields of natural sciences, social sciences, humanities, technical, medical and health sciences.

You can choose from a wide variety of training courses at different levels of training: our Bachelor (BA/BSc), Master (MA/MSc) and Doctoral (PhD) programmes are waiting for you.

The University of Szeged also offers preparatory courses for English language training.

The international perspective is reflected in the university's research and training activities through the composition of the multilingual teaching staff, the establishment of student exchange programmes and international research cooperation.

In the world of international education the University of Szeged has three decades of experience and receives students from all over the world (USA, Germany, Belgium, France, China, Nigeria, Japan, Iran, etc.) At present nearly 2,500 international students belong to this vibrant, 25 thousand strong community on this city campus of culture and science.

No compromise: you will receive high quality education at competitive prices.

Come to study at our university and be the part of our success!

Research, Development and Innovation

The intellectual potential accumulated at the University of Szeged and the research conducted here has turned the institution not only into an important centre of Hungarian higher education, but also a crucial workshop of innovation in Hungary. The University's 19 doctoral schools and its internationally respected research groups participate in high quality education and also organise and conduct basic and applied research in various areas. The centres of research and knowledge are in close working relationships and cooperate with renowned Hungarian and foreign partner organisations. As a result of the cooperation with the Hungarian Academy of Sciences (MTA), 15 research groups in 4 faculties of the University enjoy the support of the MTA.

The University of Szeged, along with its industrial partners such as companies engaged in biotechnology, is the driving force of innovation in the Southern Great Plain region. These partnerships are managed and coordinated by the University's Directorate for Research and Development and Innovation.

The University of Szeged is actively involved in drawing up medium- and long-term programmes (e.g. Biopolisz Pólus) shaping the development of Szeged and the Southern Great Plain region. The key to the regional strategy for the coming decades can be the programme based on the cooperation of natural sciences and various related disciplines. Knowledge-based elements of this programme focus on the health industry, agricultural biotechnology, environmental technology and information technology (which also prospers on its own) and support other scientific developments. The human resources for all these developments are ensured by constantly expanding and diversifying post-secondary vocational education and technical education in accordance with European endeavours and expectations.

ELI

The ELI (Extreme Light Infrastructure) Laser Research Centre, using ultrahigh intensity laser, is being built with international cooperation at three different East European locations, but will operate under a single management and use a common research strategy. The Attosecond Light Pulse Source in Szeged will provide opportunities for researchers to examine the duration of elementary processes. The main mission of the Attosecond Light Pulse Source, the laser research institution in Szeged, is to facilitate taking snapshots of electron dynamics in atoms, molecules, plasmas and biological samples on the timescale of attoseconds and femtoseconds. Medical diagnostic procedures and particle beam-based treatment are also among the applications that make use of this technology. These technologies use laser light or the so-called secondary light sources emitted by plasma generated in gas or solid target objects. The foundation stone of ELI was laid in a solemn ceremony on 6 February 2014 in Szeged.

Agricultural Engineer

Degree: Agricultural engineer BSc

Duration of the course: 7 semesters (6 academic semesters + 1 semester comprehensive professional training)

Language of tuition: English

Description of the programme: The aim of the BSc programme is to train agricultural engineers capable of realising production, leader, management, controlling and organisation work in agricultural enterprises of different size and type, completing tasks in enterprises dealing with the processing and marketing of agricultural products and also carrying out professional management duties and analysing and controlling commercial, economic processes in connection with agriculture. The courses consist of 6 academic semesters and 1 semester of comprehensive professional training. Professional training is also provided through 5x1 full time tutorial weeks' training. The thorough theoretical and practical knowledge provided by the programme enables students to work on various fields of agriculture and it also prepares them for participation in a wide range of various MSc programmes related to agriculture.

Research projects carried out on the pilot farm of the faculty, at various enterprises or research institutes under the guidance of designated supervisors are leading to the preparation of the BSc thesis that has to be publicly defended. The courses finish with a comprehensive final exam.

Application procedure

- Application requirements: secondary school leaving exam, English language (intermediate proficiency level)
- Application deadline: 15th May (for courses starting in September), 31st October (for courses starting in February)
- Application fee: 150 EUR
- Registration fee: 160 EUR
- Tuition fee: 1600 EUR per semester
- Entrance exam: on-line oral test of English language proficiency (via Skype, video conference system) within the first two weeks after the application deadline.

English Studies

Degree: Philologist in English and American Studies

Duration of the course: 6 semesters

Language of tuition: English

Description of the programme: The aim of the programme is to train experts with a comprehensive knowledge of theoretical and practical issues of English studies and general topics of humanities and social sciences, enabling them to pursue their profession in a multifaceted, inter- and multidisciplinary way. The courses provide thorough theoretical and practical knowledge and prepare students for participation in MA programmes in English and American studies. The programme offers two concentrations (one in American studies, the other in English studies) as well as specialisation in Business English and preparatory courses for a Master's programme in Education (with TEFL as one of its majors). Programme requirements include the defence of a BA thesis.

In addition to English language training (based on skills such as reading, writing, listening, presentation techniques and grammar), the programme offers a wide variety of courses in literature, linguistics, history and cultural studies, approaching these through a whole range of subject areas (such as media studies, semiotics, theoretical and applied linguistics, general and social history, and gender studies).

Application procedure

- Application requirements: secondary school leaving exam, B2 level English language examination (TOEFL/IELTS/ Other) – no separate entrance exam needed – certificate or equivalent document of advanced level language proficiency must be provided
- Application deadline: February
- Application fee: 150 EUR
- Tuition fee: 1700 EUR per semester

French Language, Literature and Culture

Degree: Philologist in Romanistics, Specialized in French Studies (BA diploma)

Duration of the course: 6 semesters, 180 credits

Language of tuition: French

Description of the programme: The aim of the comprehensive teaching programme is to train experts capable of understanding and explaining the most important practical and theoretical questions in French studies (language, literature, civilisation, culture, communication, translation). The programme provides thorough theoretical and practical knowledge. It enables students to use French in many work situations (business, travel, education, research, administration and diplomacy). The programme covers the most important elements of French and Roman linguistics, French grammar, French and French expression literature, the history of French civilization, studies on contemporary France. The programme consists of 6 academic semesters with the possibility of practice (summer stage at the Alliance Française or at French enterprises of the region, e.g. EDF Group, GDF Suez, SADE).

Application procedure

- Application requirements: secondary school leaving exam, B2 proficiency level language examination, with the option of a preparatory course at the University or at the Alliance Française of Szeged
- Application deadline: February
- Application fee: 150 EUR
- Tuition fee: 1700 EUR per semester

English Studies

Degree: Philologist in English Studies (MA diploma)

Duration of the course: 4 semesters

Language of tuition: English

Description of the programme: The aim of the programme is to train experts at an internationally competitive MA level in three disciplinary fields of academic English studies: English Applied Linguistics; British Cultural Studies: Interdisciplinary Study of Culture; Gender through Literatures and Cultures in English. The programme relies on the BA level comprehensive knowledge of theoretical and practical issues of English studies which students must have mastered in the BA programme. The MA courses facilitate further interdisciplinary studies and research to help students arrive at a critical and advanced understanding of the social–cultural aspects and practices of English speaking countries in particular, and human civilisation in general. Graduates of the programme will be able to present, interpret, argue and critically comprehend in English issues of language, communication, history, literature, society, gender and ideology in intercultural, comparative and historical dimensions. Special emphasis is placed on individual research work and personal consultations with an academic supervisor, especially during the process of writing an academic MA thesis, a requirement close to graduation.

The structure of the programme includes: Foundation courses (Theories and History of Literature and Culture, Approaches to English Linguistics, The Social Uses of Language, Research Methods in the Information Society); Specialisation introductory courses (The Multimediality of Culture, English Grammar: A Systemic-Functional Perspective, Gendering Theory/Theories of Gender: A Cultural Historical Perspective). Graduates will be eligible to apply for our PhD programme in Literatures and Cultures in English or in Applied Linguistics.

Application procedure

- Application requirements: BA diploma in English studies; English language – C1 level English language proficiency examination (TOEFL/IELTS/ GRE/Other)
- Application deadline: February
- Application fee: 150 EUR
- Tuition fee: 3500 EUR per semester
- Entrance exam: interview via Skype before May

American Studies

Degree: Philologist in American Studies (MA diploma)

Duration of the course: 4 semesters

Language of tuition: English

Description of the programme: This MA programme in American Studies is designed to assist students in developing skills and knowledge necessary for the study of the United States at a master's level. The strength of the programme lies in its interdisciplinary nature building on history, literature, identity, visual and cultural studies. The programme portfolio consists of a number of general foundation courses (Theories and Histories of Literature and Culture, The Social Uses of Language), comprehensive courses (American Cultural Studies, Visual representations: American Arts and Media, Early American Political Cultures, Dissenting voices in American culture).

Application procedure

- Application requirements: BA diploma in English Studies, English language – C1 proficiency level English language examination (TOEFL/IELTS/ GRE/Other)
- Application deadline: February
- Application fee: 150 EUR
- Tuition fee: 3500 EUR per semester
- Entrance exam: interview via Skype in May

Choreomundus – international Erasmus Mundus MA program in Dance Knowledge, Practice and Heritage

Degree: MA

Duration of the course: 4 semesters

Language of tuition: English

Description of the program: During the course of study students are introduced to theoretical, epistemological and methodological issues concerning the concept of Dance Heritage, with a focus on ethnographic material drawn from the field experiences of the four team leaders. These include examples from the Nordic countries, from Eastern and Western Europe, from South Asia, Africa and Aboriginal Australia. Further examples will be provided by visiting scholars. The programme is committed to both movement and contextual analyses and has been designed to provide every student with common scientific training, equipping them with the intellectual tools necessary to analyse dance cross-culturally and to deal with dance as intangible cultural heritage in diverse professional contexts. Fieldwork is an important feature of the courses, and brief field trips to all four continents are undertaken to allow students to engage fully with a number of European cultures. Moreover, an intensive period of fieldwork during the summer between year 1 and 2, in a country of the students' choice, is a prelude to the dissertation/thesis and a prerequisite to the successful completion of the Master's degree.

Application procedure:

- Application requirements: English language – C1 level English language examination (TOEFL/IELTS/ GRE/Other)
- Application deadline: February
- Application fee: 150 EUR
- Tuition fee: 3500 EUR per semester

Education

Degree: Educational Scientist (MA diploma)

Duration of the course: 4 semesters

Language of tuition: English

Description of the programme: This is a 120 credit master's degree programme designed for those with a BA degree in Education, Special Education, as well as kindergarten and primary school teachers with equivalent degrees. The programme includes research-oriented courses to train students in the methods of social sciences and to help them understand the relationship between the individual and universal phenomena. Teaching methods focus on fostering students' professionalism, introducing them to excellent research communities and the practice of education. The main areas of study include research methodology, psychology (cognitive and educational), theories of learning and instruction, the sociology of education and the intellectual history of education. The programme includes a 40 credit specialisation, where currently the options are educational assessment and evaluation; or early childhood and primary education. Graduates of the programme will be able to take on administrative and research roles in education, and to perform tasks that require expertise and system-level understanding.

Application procedure

- Application requirements: English, high intermediate to advanced proficiency level
- Application deadline: February
- Application fee: 150 EUR
- Tuition fee: 3500 EUR per semester

English teaching Master's degree (MEd) in teaching English

Degree: MEd - Teacher of English Language and Culture

Duration of the course: 5 semesters

Language of tuition: English

Description of the programme: Foundation, core subjects: Only for those students joining the programme NOT having completed the English Studies BA programme, but having completed the 50- credit subject module as minors.

Teaching-specific subjects: Compulsory subjects from the area of language teaching methodology as well as compulsory school-based teaching practice. This includes 60 hours of group-based experience in schools under the guidance of a mentor teacher with at least 15 hours of whole class teaching undertaken by each student. Specialist courses: The goal of this module is familiarisation with and in-depth study of specific aspects of the discipline, including the areas of language awareness, applied linguistics and language pedagogy. Courses in psychology and pedagogy are offered by the Institute of Education. The teaching practice module is provided by the training school affiliated to the university. At the end of the 4th semester students will take a comprehensive final exam in pedagogy and in English language and culture. This exam comprises both written (essay and short answers) and oral components. The final teaching exam (TZV) consists of two parts: (1) the submission and defence of a teaching-related dissertation: (2) a comprehensive oral exam on the theory and practice of English language teaching.

Main subjects: language practice, literature survey, culture survey, linguistics survey. Teaching-specific subjects: English language teaching methodology: theories and principles; English language teaching methodology: skills and practices; classroom practices in focus; school-based teaching practice. Specialist courses: English phonetics and phonology for teachers; English grammar for teachers; Multimediality of culture; Second language acquisition; Discourse as an interdisciplinary concept; Language policy in the EU and Hungary; Aspects of contemporary British literature and culture; Current approaches to North American culture; Language proficiency for teachers.

Application procedure

- Application requirements: secondary school leaving exam, English language – C1 proficiency level English language examination (TOEFL/IELTS/ Other)
- Application deadline: February
- Application fee: 150 EUR
- Tuition fee: 3500 EUR per semester

French Language, Literature and Culture

Degree: Philologist in French Language, Literature and Culture (MA diploma)

Duration of the course: 4 semesters

Language of tuition: French

Description of the programme: The aim of the comprehensive teaching programme is to train experts capable of understanding, explaining and researching all types of practical and theoretical questions in French studies (language, literature, civilisation, culture, communication, translation). Courses consist of 4 academic semesters. This programme, offering two specialisations in French linguistics and French literature and civilisation, is aimed at training experts in French with a profound knowledge of the culture, history and political systems of French-speaking countries. Special emphasis is placed on the effort to assist students in developing skills necessary for self-study, life-long learning and self-management. The programme covers the same elements of French language, literature and culture as the programmes of universities in France (Theory and Analysis of French Literature; Theoretical and Applied Approaches of Linguistics, French Aesthetics, Contemporary French Literature and Civilisation, French Philosophy) and preparing students for PhD-programmes in French Studies of all the countries of the European Union.

Application procedure

- Application requirements: BA diploma of Romance Studies, French language
 - C2 proficiency level French language examination, with the option of a preparatory course at the University or at the Alliance Française of Szeged
- Application deadline: February
- Application fee: 150 EUR
- Tuition fee: 3500 EUR per semester

German Language, Literature and Culture

Degree: Philologist in German Language, Literature and Culture (MA diploma)

Duration of the course: 4 semesters

Language of tuition: German

Description of the programme: The programme is designed to train experts in German literature and culture with excellent command of the German language through two specialisations: Language and Literature Specialisation (Spezialisierung Sprache und Literatur) and Translation and Interpretation Specialisation (Spezialisierung Übersetzen und Dolmetschen). There is a special focus on the historical and cultural grounds in the context of Central Europe as well as the transfer of cultures, languages and literature within the region. Students are trained to acquire all the information and methodological know-how that is necessary for a profound understanding of the literatures and cultures of German-speaking countries. They will be able to apply the skills and knowledge they have developed through their studies of German languages, cultures and literature. They are also expected to develop the ability to analyse intermedial cultural phenomena and language use with special regard to the various dialects of the German language. Special emphasis is placed on developing students' ability to present their knowledge in diverse circumstances ranging from scholarly to lay environments and suggest individual solutions to problems as well as the ability to plan and carry out tasks at a highly professional level. Students are also familiarised with the theoretical approaches of various schools of different ages and expected to evaluate those in a critical manner. They are also given the opportunity to develop skills of self-study and self-development, enabling them to fulfil the task of lifelong learning.

Application procedure

- Application requirements: BA diploma in German Studies, German language – C1 proficiency level
- Application deadline: February
- Application fee: 150 EUR
- Tuition fee: 3500 EUR per semester
- Entrance exam: interview via Skype in May

Study of Religions

Degree: Expert in Religious Studies (MA diploma)

Duration of the course: 4 semesters

Language of tuition: English

Description of the programme: The aim of this MA programme is to provide students with sufficient methodological, theoretical and historical background so they can understand religious phenomena and problems both in a contemporaneous and a historical contextual framework. Two specialisations are offered: the History of Religions studies ideological background, religious-philosophical reasoning and religious idioms of Hinduism, Buddhism and Islam, while the Applied Study of Religions specialisation investigates the religious entities of our modern era basically from a social scientific point of view (i.e. sociological, anthropological, psychological, etc.).

During the courses in the programme students are prepared for research development, academic discourse and the PhD programme as well - mainly by the encouragement and help they receive during the seminars and tutorial meetings. Furthermore, students are regularly involved in the on-going research activities of our department. International student mobility programmes at our department provide the opportunity of taking part in international panels, forums that make the exchange of experiences and ideas possible. Outstandingly successful participation in tender activity enhances our students' self-management skills and competitive spirit. Besides the acquisition of research methods theoretical knowledge of their fields and proficiency in basic religious languages are required for participation in the PhD programme. Talented students are prepared for the doctoral programme during tutorial meetings and academic writing seminars.

Application procedure

- Application requirements: BA in Liberal Arts with a Study of Religions specialization; Study of Religions Minor Programme degree, English language – C1 proficiency level English language examination (TOEFL/IELTS/ GRE/Other)
- Application deadline: 16th February
- Application fee: 150 EUR
- Tuition fee: 3500 EUR per semester
- Entrance exam: interview via Skype in May

Spanish Language, Literature and Culture

Degree: Philologist in Spanish Language, Literature and Culture (MA diploma)

Duration of the course: 4 semesters

Language of tuition: Spanish

Description of the programme: This programme is designed to familiarise students with the major achievements and dialects of the Spanish language and culture through courses firmly grounded in linguistics, literature and cultural history. They are also trained to acquire a profound knowledge of the culture, history and political system of Spain and Spanish-America. Fields of knowledge covered during the four-semester course include the following: the grammatical system of Spanish language, peculiar characteristics of written and oral communication, significant components of Spanish and Spanish-speaking cultures and literature, current research methods and trends in literature, linguistics and culture that help formulate successful research projects and strategies. A special emphasis is placed on efforts to assist students in developing skills necessary for self-study, life-long learning and self-management. The programme offers specialisation in Spanish literature and civilisation.

Application procedure

- Application requirements: BA diploma of Romance studies – C1 proficiency level in Spanish language examination
- Application deadline: February
- Application fee: 150 EUR
- Tuition fee: 3500 EUR per semester

Full-time Graduate Dental Medicine Programme

Degree: D.M.D – Doctor Medicinae Dentariae

Duration of the course: 10 semesters

Language of tuition: English

Description of the programme: The Dental Medicine Programme covers five academic years. The degree is accepted in several countries around the world. Citizens of the EU will receive their licences automatically within the Community. Ours was the first dental faculty in Hungary where a new, EU-compatible curriculum was introduced in the 2013/14 academic year, to suit European standards. In the first two years the students are taught basic sciences – general medical and dental courses – which are the foundations of clinical dentistry. From the second year on more emphasis is placed on the study of dental diseases and their treatment. The programme is designed to combine the basic and the clinical sciences, as it is believed that scientific and professional development cannot be sharply separated but should proceed concurrently throughout the programme. After the third year (pre-clinical module) the last two years serve the intensive clinical study of each discipline of dentistry with emphasis on the assessment and management of patients. Throughout their training students can participate in elective programs, conferences and hospital-based practices. Furthermore, they need to defend their thesis and sit for a complex comprehensive examination – the State Board Examination. Having fulfilled all requirements, candidates are awarded the Doctor of Dental Medicine degree. The language of tuition is English. However, in order to fully accomplish clinical practice, certain proficiency in the Hungarian language is also necessary.

Application procedure:

- Applicants are required to sit for an entrance examination. Holders of the following degrees can be exempted from sitting for the entrance examination on condition that they have completed their studies with excellent results:
 - IB (International Baccalaureate) Applicants need to have achieved at least grade 5 in the following subjects: English language and two natural sciences subjects (biology, chemistry or physics)
 - GCE (General Certificate of Education) A or A+ level with an A result in 3 natural sciences subjects
 - B.Sc. (Bachelor of Science) Degree in Natural, Biomedical, Life Sciences, Chemistry, Biology, Physics and Dental Hygiene for the Dental Medicine Program
- Main application requirements: Successful completion of high school; oral and written competence in biology, chemistry and English language which is to be proved as part of the entrance examination. Further application requirements can be found in the Application Brochure.
- Application deadline: 30th June
- Application fee: 200 USD
- Registration fee: 220 USD
- Tuition fee: 15900 USD per year (years 1-5)
- Entrance examination fee (if taken in Szeged): 300 USD
- For further information see the Admission and Academic Bulletin:

Business Administration and Management

Degree: Bachelor of Arts in Business Administration and Management

Duration of the course: 6+1 semesters

Language of tuition: English

Description of the programme: The programme is for students who intend to study in English for a Bachelor of Arts in Business and Management, or those who would like to attend a special and flexible higher education training, even if only for one semester. The training, conducted in English, leads to a BA degree in seven semesters. The last semester is spent in internship at a multinational or local company, or any other organisation. The degree is accredited and recognised by the government of Hungary as well as the European Union. Objectives of the study programme are to develop young men and women into professional managers in all sectors of organised economic activity, to equip them with conceptual and interpersonal skills for managerial decision-making by developing and encouraging their entrepreneurial capabilities. The programme provides a sound theoretical basis combined with hands-on practice. The programme consists of an economic, methodological and business basic module, a social sciences basic module, an advanced business module and a thesis module, all involving both lectures, providing the necessary theoretical knowledge required, and seminars including interactive discussions concerning practice.

Application procedure:

- Application requirements: secondary school-leaving certificate, oral and written proficiency in English.
- Applicants must be over the age of 18 in the year of application
- Application deadline: 30th April
- Entrance examinations are held between March and June in Szeged, Hungary, and at partner organisations at different locations around the world. The decision on acceptance is made on the basis of documents submitted and upon the result of the entrance examination consisting of written tests in mathematics and English.
- Entrance examination fee: 200 EUR (not refundable)
- Tuition fee: 2000 EUR per semester (including health insurance)

Master of Arts (MA) in International Economy and Business

Degree: MA

Duration of the programme: 4 semesters

Language of tuition: English

Description of the programme: The global trend of dynamic internationalisation of economic activities calls for human resources adaptive and responsive to such changes. Accordingly, our aim is to provide a combination of sound theoretical foundations and practical skills utilisable in our internationalised economy. The core courses consist of a lecture and a seminar – the latter is to facilitate the equipping of students with the required skills, including the ability to synthesise and organise information and to come up with strong arguments, the professional collection, analysis and evaluation of data relevant to the pursued investigation on the international scene, and the persuasive presentation of own knowledge and findings. Graduates are expected to find or even create jobs in the colourful world of international economy and business. The international flavour is guaranteed by channelled student and teaching staff exchange schemes and regular social events of international character.

Application procedure

- Application requirements: BA diploma with at least 30 ECTS credits in the compulsory fields (Methodology, Economics, Management, Social Science, Programme-specific Module), and B2 proficiency level English language examination.
- Application deadline: February
- Application fee: 200 EUR (non-EU citizens) / 9000 HUF (EU citizens)
- Tuition fee: 2500 EUR per semester (non-EU citizens) / 300 000 HUF per semester (EU citizens)
- Entrance exam: oral exam before an Examination Board related to the topic chosen from the following two: 1) European integration, 2) The global economy. Reading material for the exam is provided.

Food Engineering MSc

Degree: MSc

Duration of the course: 4 semesters

Language of tuition: English

Description of the programme: TA certified food science and technology engineer is skilled in the fields of production, technology, planning of operations, management of economic processes, development of products, quality assurance, tender-writing, and is capable of undertaking management tasks while taking into account technical and economic aspects. Entry to this specialization requires at least a college or a BSc degree. The University of Szeged course in food engineering is the ideal launch pad if you have an interest in a career as a food scientist, food technologist or food engineer. As the world population increases, food technologists are challenged with developing innovative applications in agricultural technology, biotechnology and processing of raw food materials, as well as understanding the link between food, nutrition and health.

Application procedure

- Application requirements: CV in English; BSc degree in food science and/or technology; English: intermediate proficiency level (B2) (TOEFL or equivalent)– proofs required
- Application fee: 150 EUR
- Application deadline: 15th May
- Tuition fee: 2000 EUR per semester

Master in International Relations (MIR)

Degree: MA International Relations Expert

Specialisation: International Economic Relations – Legal and Business Aspects (LBA)

Duration of the course: 4 semesters

Language of tuition: English

Description of the programme: The MIR-LBA Programme trains highly qualified professionals in command of a broad range and in-depth knowledge of social sciences, able to interpret the place and role of Hungary in an international context and are familiar with the theoretical and practical implications of international relations, with particular focus on both the legal and business aspects of international economic relations. Our graduates will also be able to place the perspectives of the Central-Eastern European region in a framework of international (economic) relations creating legal and economic challenges. The graduates are familiar with the developmental trends outside of Europe and understand their motivations, and they will be equipped with high-standard multidisciplinary knowledge extending to the study of culture and civilization, world economy, international law, political science as well as with practical knowledge on diplomatic relations, etiquette and protocol, and negotiation techniques. MIR-LBA furthermore trains professionals in the study of the fundamental institutions, resources and processes, both in legislation and in practice, that define the most important economic powers in international, European and in other terms. As graduates, our students will also be familiar with the social implications of these legal and political institutions, resources and processes that might influence economy, politics and society in other countries as well. It is a priority of MIR-LBA to develop competencies enabling the comparative study of current institutional-legal and dispute resolution models as well as such institutional structures through an analytical point of view. Through the in-depth, comparative assessment of these different models and structures, our graduates shall have a better understanding of complex intra-institutional relations.

Application procedure

- Application requirements: English language proficiency – B2-C1 CEFR, 6,5 IELTS, 93 TOEFL (or equivalent). It is a precondition of admission to the Master training courses that applicants have at least 30 ECTS points obtained in the following domains of knowledge:

1. Introduction into social sciences
 2. Legal and administrative studies
 3. Economic studies
 4. Political science studies
 5. Historical, cultural and linguistic studies
- Application deadline: 30th May
- Tuition fee: 1000 EUR/1300 USD per semester

Master in International Relations in French

Degree: MA International Relations Expert

Specialisation: European Studies (double degree: MA of Lille Institute of Political Sciences)
Regional Studies: African development (double degree: Senghor University)

Duration of the course: 4 semesters

Language of tuition: French

Description of the programme: In its scientific discipline, the International Relations Master's Programme was the first qualification in a foreign language to be accredited in Hungary. There are two types of specialization in a course that awards two certificates: European Studies and African Development. The aim of the programme is to provide an exceptional training for European and African students that delves into the issues of each particular specialization and at the same time extends to other disciplines, directly connected to international relations. Since courses are held in foreign language and owing to the vast international network of the Faculty, students are able to absorb knowledge and skills from native speaker French, Belgian and African professors that are essential for facing the challenges of labour market. Aside from the professors, there are many experts participating in the education. Therefore students are able to get hold of pragmatic expertise that is vital in European and African public administration and in the private sector. On both specializations, as a result of the multidisciplinary tuition, students are going to obtain knowledge in the fields of political science, law and public administration. So the goal of the Master is to train experts with a thorough and multidisciplinary approach concerning international issues, thus enabling them to commence a professional career in the public or private sector: in diplomacy, as a European Law specialist, in executive positions at companies, as expert/advisor in European or African relations, lobbyist, or in the fields of international cultural relations and of European or international administration.

Application procedure

- Application requirements: French language – B2 proficiency level. It is a precondition of admission to Master Training that applicants have at least 30 ECTS points obtained in the following domains of knowledge:

1. Introduction into social sciences
2. Legal and administrative studies
3. Economic studies
4. Political science studies
5. Historical, cultural and linguistic studies

- Application deadline: 30th May

- Tuition fee: 1000 EUR/1300 USD per semester

Full-time graduate Pharmacy Programme

Degree: Doctor of Pharmacy

Duration of the course: 10 semesters

Language of tuition: English

Description of the programme: The Academic Programme offered by the Faculty of Pharmacy leads to the degree Doctor of Pharmacy. This programme extends over a period of five years (10 semesters). The degree is accepted in several countries around the world. Citizens of the EU will receive their licences automatically within the Community. Pharmaceutical training begins with an introduction to the basic sciences providing a basis for further pharmaceutical studies. In the second part of the course students take part in general and special pharmaceutical training at the university's departments, teaching pharmacies, institutes, laboratories and pharmaceutical works. The faculty seeks to train its undergraduates by promoting their intellectual development and their progressive accumulation of competence in all fields of modern pharmacy. In the final year students participate in professional practices in Hungarian pharmacies. Furthermore, they need to defend their theses (doctoral dissertations) and sit for a complex comprehensive examination – the State Board Examination. Having fulfilled all requirements, candidates are awarded the title Doctor Pharmaciae (Pharmacist, Dr. Pharm.).

Application procedure

- Applicants are required to sit for an entrance examination. Holders of the following degrees can be exempted from sitting for the entrance examination on condition that they have completed their studies with excellent results:
 - IB (International Baccalaureate) Applicants need to have achieved at least grade 5 in the following subjects: English language and two natural sciences subjects (biology, chemistry or physics)

Chemistry

Degree: Msc

Duration of the course: 4 semesters

Language of tuition: English

Description of the programme: The programme is based on the accredited curriculum used at our university for Chemistry MSc studies. After meeting the requirements of the programme, consisting of an optional preparatory course (strengthening the English language proficiency of students) and four semesters of theoretical studies complemented by a practical laboratory course, the students will have an extended knowledge and understanding of the most important experimental and theoretical principles in chemistry, which qualifies them for employment as professional chemists in chemical and related industries or in public service. They will attain standard understanding of chemistry and competences which will give them access to PhD programmes. They will have the ability to communicate their knowledge to specialist and non-specialist audiences and develop learning skills enabling them to continuously update and refresh their knowledge in chemistry. The duration of the programme is 24 months (four semesters), which may be preceded by a preparatory module (English language and chemistry-specific preparatory courses ~8 weeks). The four-semester theoretical training will contain courses in mathematics, physics and informatics, all of them geared to the needs of the more demanding Advanced physical chemistry, Industrial chemistry, Analytical chemistry and Computational/theoretical chemistry courses of the second semester, while the first semester also contains advanced inorganic, organic and biological chemistry courses. The theoretical education is closely linked with related practical courses. After the 2nd semester students must take part in research projects of the groups at the Department and they have to prepare a working project (short-term research in the 2nd semester) and one diploma work during the 3rd and 4th semester (longer-term research). The MSc module finishes with a final examination before the professors of the department.

Application procedure

- Application requirements: Chemistry BSc degree, intermediate level of English knowledge (TOEFL iBT test score of 90, or PBT score 550; Cambridge First Certificate "B"; IELTS score of 5.0)
- Application deadline: 1st July
- Application fee: 200 USD (not refundable)
- Registration fee: 220 USD
- Tuition fee: 4000 USD/3670 EUR per semester

Biology

Degree: Msc

Fields of study: Molecular Biology – Biotechnology – Microbiology

Duration of the course: 4 semesters

Language of tuition: English

Description of the programme: The Biology MSc Programme is a 4-semester-long (2 academic years) multidisciplinary programme offered by the Biology Departments of the Faculty of Science and Informatics. The programme is open to qualified students who hold a Bachelor's degree (or equivalent degree) from an accredited university in biology, chemistry, medicine, pharmacy, agriculture or related fields, and have a good command of the English language. The Programme provides our students with a rigorous and challenging curriculum to succeed in their post-academic and professional endeavors.

The first year of the programme comprises lectures, seminars and practical classes in advanced genetics, molecular biology, biotechnology, bioinformatics, immunology, cell biology, microbiology and plant biology. Both the basic and the applied/industrial science aspects of these disciplines will be extensively studied. The second year offers many more specialized lectures that are tailored to the students' individual interests, but the emphasis will now be placed on practical education: the students will have several laboratory courses in different aspects of molecular biology, cell biology, biotechnology and microbiology. Each course ends with a written or oral exam. During the last semester, independent research projects will be carried out with the help of tutors from our academic staff. This project will lead to preparing an MSc Thesis that has to be publicly defended, and it is part of the MSc certificate/diploma. The Programme's intensive, applied science-oriented education qualifies our students for a wide variety of professional work. Our graduates will find lucrative future careers in many fields including research laboratories, educational institutions, hospitals, clinics, pharmaceutical, food, agriculture and chemical industries, environmental agencies, etc. Successful graduates can also continue their studies and research by applying to our international Biology PhD program at the University of Szeged.

Application procedure

- Application requirements: CV in English; BSc degree from an accredited university in Biology, Chemistry, Medicine, Pharmacy, Agriculture or related fields; transcript; English: intermediate proficiency level (B2) – proofs required (TOEFL iBT test score of 90, or PBT score 550; Cambridge First Certificate "B"; IELTS score of 5.0)
- Application procedure: decision of acceptance can be made based on the documents submitted or a Skype interview; alternatively, an oral examination can be arranged in Szeged
- Application deadline: 1st July
- Application fee: 200 USD (not refundable)
- Registration fee: 220 USD
- Tuition fee: 4500 USD per semester

Postgraduate Specialist Training in Laser Physics

Degree: non-degree

Duration of the course: 2 semesters

Language of tuition: English

Description of the programme: The aim of the training programme is to complete and upgrade the knowledge of a Physics degree with specialization in laser Physics and light matter interactions.

Application procedure

- Application requirements: master degree in Physics without a specialization in laser physics or master degree in electrical engineering with a sufficient background in Physics, English language - intermediate proficiency level (B2) (TOEFL or equivalent)
- Application form can be downloaded: <http://www.titan.physx.u-szeged.hu>
- Application fee: 200 USD (not refundable)
- Registration fee: 220 USD
- Application deadline: 1st July
- Tuition fee: 3370 USD/ 3000 EUR per semester

For further information please contact:

Software Information Technology

Degree: MSc

Duration of the course: 4 semesters

Language of tuition: English

Description of the programme: The aim of the program is to train Information Technology professionals who can perform the development, creation, application, implementation, and operation of IT systems either individually or as a team member at advanced level. Furthermore, it provides the cooperative and modelling skills required to solve and research IT related problems, and ensures solid theoretical background to pursue PhD studies.

The graduates are able to use problem solving techniques in the design and implementation of enterprise resource planning systems; to apply state of the art modelling techniques; and to design, implement, and operate decision support systems.

Main subjects: Graph Theory, Automata and Formal Languages, Application of Linear Programming, Advanced Programming, Advanced Image Processing, Online Algorithms, Machine Learning Algorithms, Advanced Graphics Algorithms, Advanced Approximate and Symbolic Computing, Program Systems Development, Software Development, Logic and Functional Programming, Web Technologies, Nonlinear Programming, Geographic Information Systems, Data Mining, Parallel Programming.

Application procedure

- Application requirements: BSc degree (Computer Science or related), English language - intermediate proficiency level (B2) (TOEFL or equivalent)
- Application deadline: 1st July
- Application fee: 200 USD (not refundable)
- Registration fee: 220 USD
- Tuition fee: 3500 USD / 3200 EUR per semester

Natural Hazard and Risk

Degree: MSc in Natural Hazard and Risk (MSc diploma)

Field of study: Environmental Geography

Duration of the course: 4 semesters

Language of tuition: English

Description of the programme: The programme trains experts who can measure and analyse the environment, map elements at risk, model natural processes, and manage hazards and risks (prevention, mitigation and remediation). In the first semester the courses focus on general introduction, data acquisition, and visualisation and communication of the results. During the second and third semesters different types of hazards will be analysed in-depth: the theoretical background of a given hazard, laboratory and map surveys of its contributing factors, modelling the processes, and different ways of management will be studied. These units will be presented by an expert of a field, thus students will be provided by the best guidance. In the fourth semester the student has to compile a thesis on a given hazard causing problems in the student's country.

Application procedure

- Application requirements: BSc degree with min. 65 credits in the field of natural science, economic and human science, relevant, English language - intermediate proficiency level (IELTS 6.0 or TOEFL 85)
- Application deadline: 31st March
- Application fee: 200 USD (not refundable)
- Registration fee: 220 USD
- Tuition fee: 2180 USD / 2000 EUR per semester

The greenest Hungarian University

The University of Szeged is the greenest Hungarian university, and on the Green Universities top list it is ranked 19th in 2014.

What makes a university green? A green university is committed to environmentally responsible behaviour and environmental consciousness as an educational concern. Whether in its energy strategy concerning larger investments or in its everyday climate-friendly activities, the University of Szeged always attempts to demonstrate through its popular programmes that the staff and students of the institution take the protection of the environment seriously. As a result, according to the Indonesian UI Green Metric Ranking of World Universities, the University of Szeged was found the greenest university in Eastern Europe in the last years.

University Congress Centre

The Congress Centre that opened in January 2005 was founded by the University of Szeged and the local government. It takes pride in providing a perfect place for over 1.000 business, cultural and scientific events by hosting the following facilities:

- 25000 m² on 6 floors
- the capacity can take up to 1.300 persons at the same time
- the best place to conventions and conferences, university and business meetings, exhibitions and concerts
- a fascinating and sunlit 1.000 m² Atrium for gala dinners and professional exhibitions
- 10 individual lecture and seminar rooms
- sophisticated audiovisual technologies by a high-skilled technical team
- a great variety of Hungarian and international cooking by our catering partner

The Congress Centre is the premier venue for conventions, meetings and large-scale events with its 7.000 m² banquet facility having a capacity of hosting as many as 1.300 people at the same time. The elegant Congress Hall taken up to 685 people maintains an intimate and interactive presentation environment, moreover offers a perfect venue for concerts and performances as well.

Cultural life

Our annual cultural festivals offer over 500 programmes on average at more than 100 different venues; 320 participants enter the talent-spotting competitions organised by the university. We have 27 registered amateur artistic groups, such as choirs, theatre groups and symphonic orchestras.

The cultural events organised by the university complement perfectly the wide variety of cultural programmes sponsored by the city, as the festivals also attract audiences outside the university. Since 2000 the Autumn Cultural Festival, and since 2004 the University Spring have been held annually. At these exhilarating events students of the university can demonstrate their talents alongside famous artists at the various premieres, exhibitions and meetings.

The results and rankings of the athletes attending the University of Szeged clearly demonstrate that the institution is an active and successful participant in sporting events organised by universities worldwide. Furthermore, the sporting events that were held over previous years in the city also prove that the University of Szeged is among the best in the management of sports events. All these successes reflect the university's general attitude, that is, besides scientific results, achievements in competitive and recreational sports are equally important parts of student life.

Participating in sports events and festivals, attending balls and spending nights at parties in university clubs are all as much part of the legendary university life in Szeged as is attending lectures and laboratory classes.

Student Life

Being a sportive institution, the University of Szeged offers such a wide variety of sports activities that the time spent studying at the university proves to be too short to try out all of them. To mention just some of the less common ones: every student has the opportunity to try parachuting, horse riding, skiing, yoga; all in addition to the university's sports associations where competitions are held in a number of sports from fencing to basketball. Our men's basketball team, SZTE-SZEDEAK, made it to Group B of the First Division NB I in 2007. We are proud of the many Olympic and world champion athletes, including kayaker Natasa Janics and water polo player Gergely Kiss, who have chosen the University of Szeged for their studies. Szeged has frequently been the venue for international sports events. One of the most prominent of these was the World University Squash Championship in 2006 with participants from all over the world.

University club meetings, parties and performances, in the JATE-KLUB in particular, offer rich and pure entertainment to everybody. Szeged's cultural life would be unimaginable without these events or the ones staged in student hostels. Whether looking for a film club or a place to dance or sing, everybody can find what their hearts desire among the amateur groups and associations of our university. Events of the Autumn Festival, the University Spring and programmes of the TIK provide a foretaste of these activities for outsiders as well.

During the carnival season every faculty holds its own ball with music and dance. One of the most noted ones is the traditional University Charity Ball which has become one of the most prestigious events of social life in Szeged.

No wonder that after graduation many leaving students miss the joyful events they experienced during the years spent at the University of Szeged. To help them feel and enjoy the support of the institution and the warmth of the university community all their lives, former students can stay constantly in touch with the university through the Alma Mater organisation. Everybody who finds it important to participate in university life even after graduation is welcome to attend the postgraduate course fair, professional and class reunions, festive events, including the Alma Mater Christmas party, the Alma weekend and the university sports day.

**Come to study at the
University of Szeged and
be the part of our success!**
